

## The latest PowerPay product gives your merchants a 360° payment solution!

This first-of-its-kind solution turns a standard mobile phone into a credit card terminal without any extra equipment, allowing small merchants to accept payments virtually anywhere. This safe and convenient solution offers savings over typical wireless terminal fees, directly affecting the bottom line, possibly creating the “make or break” difference to small businesses.

### **This is the perfect solution for the merchant on the move!**

This is the perfect solution for merchants selling their products and services just about anywhere, from the school fundraising bazaar or local farmers markets to contractors and home delivery services collecting larger sums of money. Merchants will have the freedom to accept VISA, MasterCard, American Express, and Discover credit cards and email receipts to customers.

### **Security Features**

All credit card activity is processed in real time and completely secure via an encrypted SSL network. Card numbers are removed from the mobile phone instantly and converted to order codes, adding further protection than the average paper-based transaction.

### **Additional benefits**

- Immediate approval or decline notice helps merchants eliminate fraudulent payments
- Saves both time and money associated with bad debt collections
- Businesses can utilize one merchant account, allowing an entire remote workforce to use their current mobile phones and easily reconcile books via one safer organized portal
- The product is integrated with our EasyPay gateway, which means no additional per transaction fee
- PCI Compliant
